RESUMO PROFISSIONAL

Full Stack Developer with a backend focus, specializing in SaaS applications, REST APIs, microservices, and AI-driven solutions. Experienced in building and maintaining production systems using Python, FastAPI, Node.js, JavaScript, PostgreSQL, Redis, and Docker, handling everything from architecture to deployment and continuous application evolution. At Farmácia Pague Menos, I supported enterprise systems, resolving incidents related to POS terminals, tax invoice issuance, and critical applications. I have developed real-time automation SaaS platforms, Telegram-integrated bots, scheduling systems, web scraping automation, and AI-driven solutions. My expertise includes REST APIs, JWT authentication, Git, Docker, asynchronous processing, system integration, software architecture, Clean Architecture, SOLID principles, and agile methodologies. I possess an analytical, proactive mindset focused on delivering scalable, secure, and high-quality solutions.

EXPERIÊNCIA PROFISSIONAL

Full Stack Development Assistant

Farmácia Pague Menos

- I worked on the maintenance and evolution of corporate systems used by the retail chain. I diagnosed, investigated, and resolved incidents involving critical applications, POS systems, and tax invoice issuance processes. I analyzed production failures, documented incidents, and collaborated on root cause analysis to ensure system stability. I collaborated with development, support, and tax teams to resolve issues and validate business rules. I participated in Agile ceremonies (Daily Scrum), tracked work items, and validated fixes prior to production deployment. I contributed to the continuous improvement of application quality through bug identification, testing, and technical documentation.

FORMAÇÃO ACADÊMICA

Graduação / Bacharelado em Computer Science

UNIGRANDE

HABILIDADES E COMPETÊNCIAS

Técnicas: Python, JavaScript, TypeScript, SQL, FastAPI, Flask, Node.js, Express.js, REST API, JWT, OAuth2, PostgreSQL, Redis, SQLAlchemy, AI Agents, Semantic Memory, GitHub Copilot, Anti Gravity, Web Scraping, Automation, Git, Microservices, Clean Architecture, SOLID, Scrum, Kanban, Agile, Docker Compose, Linux, CI/CD, AWS

Idiomas: Inglês - Intermediário
